The value of this rating depends on the answer you gave to each characteristic-honesty. If you have not been totally honest with yourself in evaluating all these factors, the results will have to be adjusted accordingly. It is wiser to evaluate yourself too low than too high.

If your score was between 120 and 150, you have a strong entrepreneurial personality and will probably do very well as the boss of a new business.

If you scored between 100 and 120, you probably have enough of the right stuff to be successful if you make the effort to bolster your skills in the weaker areas.

If you scored between 80 and 100, you probably should not try to shoulder a new business on your own. Look for partners or reliable employees who can strengthen the firm in the areas where you are weak.

If you scored less than 80, you will probably be happier and more successful as a manager in someone else's company than in a business of your own.
